

RELIABILITY WITH PATENTED ACTIVE-CONNECT-TECHNOLOGY (ACT)

STANDARD DUAL-CURING LUTING COMPOSITES

Dual-curing composites without ACT often do not cure completely on acid-etched tooth surfaces and/or those pretreated with adhesive or primer and require an additional activator (referred to as self-cure activators (SCA)).

Please contact us if you have any more questions about the adhesive luting composite Visalys® CemCore:

VISALYS® CEMCORE WITH ACT

The integrated phase transfer catalysts lead to mixing at the interface between Visalys® CemCore and Visalys® Tooth Primer. The integrated AC Activator guarantees reliable polymerization, even under acidic conditions or in the dark.
